Ilana,

The text in the box says "Breached Water Line." That is the map referenced as Document 5.

The Acetone and Chlorine Pad Sampling results were generated by your client's contractor – CTEH. I assume you can get those from your client.

I double checked with JJ and he thinks the Chemicals list is Halliburton's as well, so we will change that in the index as well as the name of the Data Verification Package.

Thanks,

Confidential Settlement Communication, Subject to FRE 408

Sheila,

Thanks for sending the additional files.

In the "Eisenbarth #7 Well Site Map" file, there is a rectangular box underneath the "Well Head" that is not legible. I tried zooming in, but the text does not come into focus. Could you please let me know what is written in that box?

Is the "Eisenbarth #7 Well Site Map" file, Doc ID 5 on the index you sent me?

The file "ChemicalsOnSite" is identified as a Statoil document. I have reason to believe that this list comes from Halliburton. Can you let me know why EPA believes that this list was authored by Statoil? I know that Statoil did not possess this information and needed to obtain it from Halliburton.

Please send me the acetone and chloride pad sampling results -- Doc IDs 6 and 7 on the index.

I noticed that the file name for Doc ID 11 is different from the name of the document -- should it be changed on the index?

Thanks,

Ilana

Subject: Administrative Record Documents

Ilana,

Attached are the remaining documents in the draft Administrative Record as well as the sample location map for the ALS samples.

I will revise the proposed AOC in line with the changes we agreed upon today and send you the revised version this afternoon.

Thanks,

Sheila McAnaney
